## Meet the E&S Team

Evans & Sutherland has been distributing fulldome content for over 30 years and offers the largest catalog with over 200 shows. We have well-established relationships with fulldome and giant screen producers like National Geographic, NSC Creative, Softmachine, MacGillivray Freeman and Mirage3D and are committed to serving the industry's content needs. Our team is ready to help you through the entire process, from show selection, to licensing and delivery.

### Estelle Pacalon

Show distribution and Sales Manager

Estelle Pacalon's knowledge and expertise in planetariums and giant screen cinema is at your disposal. She can personally guide you through the show selection process and find the right content to fit your mission.

Estelle Pacalon  
epacalon@es.com

### Jenn Davis

Licensing, Delivery, Customer Service

Jenn Davis has been with E&S for 3 years and oversees show logistics. She can help you with licensing, delivery, and any questions or concerns you might have.

New Release from Mirage3D and E&S

# MARS

ONE THOUSAND ONE

2018

52 min, 42 min, 30 min

**Available Languages:** EN, GR, DU, FR, JP, MA

**Producer:** Mirage3D + E&S + GOTO Inc

**Genre:** Space Travel

**Password:**  
mirage3d

52 min 42 min 30 min

An international crew of astronauts is about to embark on the first interplanetary journey in history, the first manned mission to the surface of Mars. Reporter Miles O'Brien is reporting live from his Space Headquarters TV Studio in New York while events unfold for the crew on their 1001 day long mission.

We will witness firsthand their brave attempts to put human footprints on Mars and return safely to Earth. This journey is made possible by the biggest engineering feat ever and loaded with scientific experiments. The explorers will be extending our knowledge of Mars and will be learning whether or not mankind has a future among the stars. Experience the thrill of the grandest mission of exploration ever undertaken!

New Release from Evans & Sutherland

# UNSEEN UNIVERSE

2019 24 min

**Available Languages:** EN, MA  
**Producer:** Evans & Sutherland  
**Genre:** Astronomy

**Password:**  
**UNSEENUNIVERSE**

This exciting look into cutting-edge astronomy features the Event Horizon Telescope and the first image of a black hole ever captured.

For millions of years our view of the heavens has been limited by our eyes; allowing us to only see a narrow band of electromagnetic radiation we call visible light. For the first time ever, in the greatest breakthrough since the invention of the telescope, we now have the technology to capture the Universe over an amazing width of the spectrum and beyond. We can even interlink telescopes around the world to capture data on a global scale.

Unseen Universe makes what was once thought to be unseeable, seeable.

ASTRONOMY & SPACE TRAVEL

# Capcom Go!

Astronomy & Space Travel 7

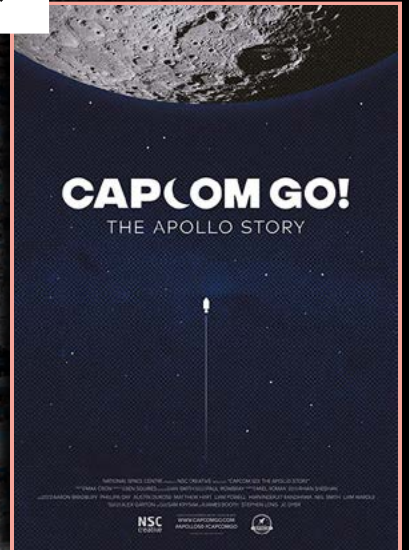

2019 26 min

On July 20th 1969, 600 million people around the world gathered to witness a historic moment of human achievement broadcast live from the Moon. But few people were aware of just how huge an effort it had taken to get them there. These Apollo 11 astronauts were just 2 of nearly 400,000 people who had worked over ten years towards this goal. But how did they do it? What did it take to put humans on the Moon?

**Available Languages:** EN, GR, FR, IT

**Producer:** NSC Creative

**Genre:** Space Travel, History

# VOYAGER

2019 27 min

In 1977 two space probes were launched to explore the farthest planets of the Solar System: Jupiter, Saturn, Uranus and Neptune along with their moons. These spacecraft greatly enriched our knowledge of the distant worlds. Now, after four decades, they explore interstellar space like two bottles launched into a cosmic ocean, carrying "The Golden Record" an interstellar message intended for any alien civilization.

# Faster Than Light

2017 25 min

The impulse to strike out into the unknown, to see what's over the horizon, is as old as humanity. Today, a whole new horizon beckons. Scientists now believe that our galaxy is filled with solar systems, including up to 9 billion Sun-like stars with planets similar to Earth. Astronomers are racing to find habitable worlds, including any that might exist in the neighborhood of our Sun. But if we find one, how will we ever get there? How long will it take? What rocket designs might one day conquer the voids of space?

# Birth of Planet Earth

Astronomy & Space Travel 9

4K

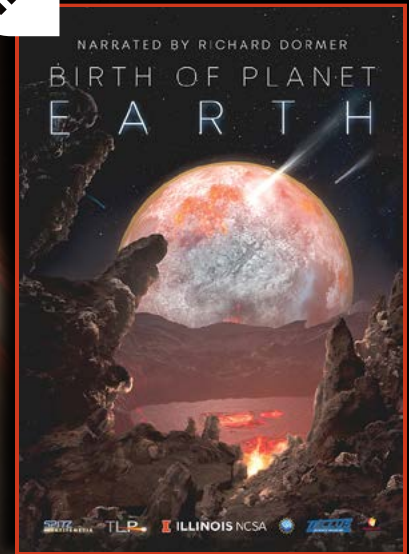

2019 24 min

Scientists now believe that our galaxy is filled with solar systems, including up to a billion planets roughly the size of our own. The film employs advanced, data-driven, cinematic-quality visualizations to explore some of the greatest questions in science today: How did Earth become a living planet in the wake of our solar system's violent birth? What does its history tell us about our chances of finding other worlds that are truly Earth-like?

## EXO

Are We Alone?

2018 33 min

Humankind has always sought to understand the mysteries of the Universe and speculated about the possibility of extraterrestrial life. Today, we know of thousands of exoplanets, planets located outside our Solar System, that offer valuable information about our own planet, its origins, and life on Earth. We're on the cusp of making some fascinating discoveries. How will they change our lives?

## Explore

2017 27 min

By closely examining the example of Johannes Kepler and his three laws of planetary motions, "Explore" shows how the achievements of individuals can change the world, and how much we all benefit from them.

Kepler's theories about planetary ellipses opened the universe to exploration in ways he never dreamed of, centuries after his death. Kepler's Laws are fundamental in physics and astronomy and central to modern spaceflight. Transporting ships, people, and cargo beyond Earth depends on these laws of motion.

# Beyond The Sun

Astronomy & Space Travel 15

   2018 26 min

Celeste is a little girl who wants to explore the Universe, find new Earths and learn how to find exoplanets. While fighting off sleep in her room by reading a book on astronomy, she receives an unexpected visit from the Moon. Together, they enjoy a journey through the Universe to discover what exoplanets are and how they can be detected. They observe rogue planets, oceanic worlds and super-Earths. The Moon tells her about exoplanet hunters, who observe the sky in search of planets like Earth.

In 2017, a team of researchers announced the greatest geological discovery of our time: the existence of an eighth continent, almost completely submerged beneath the Pacific Ocean. How Zealandia became a refuge for one of the strangest collections of animals on the planet is a mystery 85 million years in the making. Journey through time to explore the weird and wonderful life on remote islands and encounter survivors of the geological equivalent of Atlantis.

# The Last Reef: Cities Beneath the Sea

4K

2012 40 min

Fly across iridescent tropical reefs, brush through a cloud of a million jellyfish, visit an alien world where the closer you look the more you see, where the tiniest creatures support the greatest predators... We think of reefs as exotic, distant places with little or no connection to our everyday world. Yet, every reef is a living city beneath the sea with a parallel existence to ours, distant yet undeniably connected.

# Supervolcanoes

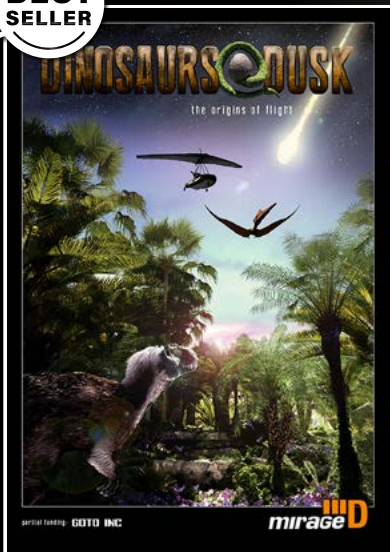

2012 24 min

The scene was 74,000 years ago, on the island of Sumatra. A volcanic eruption triggered the sudden and violent collapse of a vast regional plateau. Toba, as the volcano is known today, was the largest volcanic eruption in the last 25 million years. On a visit to a legendary North American hot spot, Yellowstone National Park, the film asks: can a supervolcano erupt in our time?

Evans & Sutherland is the industry leader in dome projection with over 50 years' experience in immersive display. We provide display systems, programs, and interactive software for science centers, planetariums, and premium giant screen theaters. Our cutting-edge planetarium system, Digistar 6, offers the best possible combination of image quality, simulation power, ease of use, and an ever-increasing set of advanced features. E&S products have been installed in over 1,300 domes worldwide.
